Section 1—Teaching Context Description

Teacher Name: __________________________________ Date of Work Sample: ______________________

Class/Classroom Information

NRS levels in class (list all that apply) __________________________________________________________

Age range of class _________________________________________________________________________

Number of students present for lesson __________________________________________________________ 

Other pertinent information about the students:

Section 2—Classroom Lesson Description

1. Math Content Area(s) Covered
   _____ Number and Operation Sense with a specific focus on _________________________________
   _____ Proportional Reasoning
   _____ Geometry and Measurement with a specific focus on _________________________________

2. Title and Source ofANI Suggested Lesson(s) ________________________________________________

3. Length of Lesson (Number of hours over how many days) _________________________________

4. What did you plan?
   a. Learning Goal(s) and Objectives/Outcomes to be accomplished by students. In other words, what will students know and be able to do at the end of this lesson? Consider: What concepts will they gain? What procedures will they use? What strategies will they apply? What types of reasoning will you expect them to use? How will you plan for maximum engagement?
   b. What connections do you hope students make (to their lives, GED, other disciplines, or math topics)?
   c. How do you plan to maximize communication among students?
   d. Rationale for Objectives/Outcomes (Why are they important? How are they related to student goals?)
   e. Describe any planned adjustments to the ANI suggested lesson (in objectives, activities, or materials) to accommodate individual differences in learners (goals, learning styles, achievement, language, special needs, developmental levels, cultures, etc.).
5. What actually occurred?
   a. Describe the lesson chronologically as it occurred. Make sure to tell what you did, what students did, and what materials were used. Describe any unplanned adjustments made during the lesson and why.
